

Job Title: Junior Data Analyst**Job Description:**

We are seeking a detail-oriented Junior Data Analyst to join our dynamic team. The ideal candidate will bring a strong foundation in data analysis, visualization, and problem-solving. This role involves working with datasets, creating dashboards, and supporting strategic decision-making processes.

Responsibilities:

- Analyze datasets to identify trends and insights.
- Build and maintain data visualization dashboards using tools like Power BI or Tableau.
- Collaborate with cross-functional teams to define business requirements.
- Write and optimize SQL queries for data retrieval.
- Present findings to stakeholders in a clear and concise manner.

Requirements:**Skills:**

- Proficiency in **Python** and **Excel**.
- Basic knowledge of **SQL** and **Git**.
- Familiarity with **Power BI** or similar tools for data visualization.
- Strong communication and time management skills.

Experience:

- 6+ months of experience as an intern or trainee in data-related fields.
- Previous roles such as **Data Analytics Intern** or similar are highly regarded.

Education:

- A **Bachelor of Technology** degree or equivalent technical qualification.
